

# Do Australians really need to take vitamin D supplements?

Recent systematic review evidence and problems with laboratory analyses

Presentation by

**Prof. Alison Avenell**

## BIO

**Professor Alison Avenell**  
**Clinical Chair in Health Services Research**  
**University of Aberdeen, Scotland**

Alison Avenell practices as a Consultant in Clinical Biochemistry with clinical practice in diabetes, obesity and clinical nutrition support. Her research at the Health Services Research Unit at the University of

Aberdeen focuses on the rigorous, critical evaluation and development of the evidence base for and against nutritional interventions, including vitamin D, and weight management approaches relevant to health services. She has particular expertise in systematic reviews (e.g. Cochrane reviews, mixed-method systematic reviews incorporating qualitative research and health economics), and conducting large pragmatic trials with older people, surgical and intensive care populations.
